

Diagnostic Report

The Diagnostic Report provides an individual skills assessment and other diagnostic information for each of the students you have selected. This report helps teachers determine how to improve their students' performance. It also supports a direct discussion with an individual student's parents or guardians.

Each student's report prints on a separate page. The Diagnostic Report also suggests how the student can achieve additional growth, especially if the student falls below the 25th percentile.

ENTERPRISE When you print this report for a student who has taken a STAR Reading Enterprise test, there are three additional options available: Benchmark, Show Skill Area Scores, and Use Trend Score. If a student has taken both a STAR Reading test *and* a STAR Reading Enterprise test, the report will use the data from the most recent test.

The report will indicate if any students took a test using extended time limits, with a footnote explanation.
